SUMMARY

Information Technology specialist and Software Engineering student with strong hands-on experience in server administration, networking, software development, and UI/ UX design. Seeking to contribute to building, securing, and optimizing modern systems while delivering reliable technical solutions. Passionate about data security, system performance, and high-quality software development, with proven leadership skills in managing teams and executing projects efficiently.

EDUCATION

Bachelor of Software Engineering

Taiz university

01/2023 – Present

Taiz yemen

Information Technology (IT) – Diploma (2 Years)

Taiz university

01/2021 – 01/2023

Taiz Yemen

Completed two years of study in Information Technology, then transitioned to Software Engineering to specialize in advanced software development and system design.

PROFESSIONAL EXPERIENCE

Server Administrator & Module Developer

Hesabati Company (Remote)

01/2026 – Present

Riyadh, Saudi Arabia

- Managed and configured cloud-based Ubuntu servers
- Developed modules for financial and accounting systems
- Optimized system performance and configurations
- Maintained servers, applications, and databases
- Designed system architecture and analyzed data
- Implemented system integration and data communication
- Built servers using Node.js
- Developed web applications using PHP and deployed via XAMPP
- Applied data encryption and security best practices
- Improved software quality, stability, and performance

Frontend and UI/UX Developer

Freelance

02/2022 – Present

Online

- Designed user interfaces using Figma and Adobe XD
- Developed responsive web interfaces using React and Next.js
- Built modern UI components using Bootstrap
- Created data visualizations and system diagrams
- Used MATLAB for computational analysis

Worked with GPS data systems

Accounting System Developer(Remot)

Pos solution

02/2023 – 02/2024

Aden Yemen

- Contributed to the development of a financial accounting system
- Designed and implemented a delegate tracking module
- Led task distribution and team coordination
- Analyzed system requirements and improved performance
- Ensured secure coding practices and code quality

SKILLS

TECHNICAL SKILLS

- Systems and Server Administration : Linux (Ubuntu), Windows Server, Cloud Servers, Node.js, XAMPP Networking: Networking fundamentals (CCNA- level), troubleshooting
- Programming : C#, Python, Java, C++, PHP,
- Laravel, Flutter, JavaScript Frontend : React, Next.js, Bootstrap Databases : SQL, Oracle,
- Microsoft Access Data Analysis : Python (Pandas), MATLAB, GPS data processing UI/
- UX : Figma, Adobe XD Tools : GitHub, Docker
- Development Environments: Visual Studio, VS Code,
- Android Studio
- Security : Data encryption, secure coding, system protection

SOFT SKILLS

Team leadership, problem-solving, communication, system analysis, teamwork, report writing

CERTIFICATES

Linux system administration

Basic to intermediate knowledge in managing Linux systems, including installation, configuration, user management, file systems, and server setup.

Data Analysis

Experience in analyzing datasets using tools such as Python (Pandas) and MATLAB, including data cleaning, visualization, and interpretation.

Database Management

Understanding of database design, SQL queries, data modeling, and managing relational databases such as Oracle and Microsoft Access.

Project Management

Knowledge of project planning, task organization, team coordination, and basic methodologies for managing software development projects.

Computer Maintenance

Skills in diagnosing hardware and software issues, performing system troubleshooting, and maintaining computer performance.

Problem-Solving

Strong ability to identify technical issues, analyze root causes, and implement effective and efficient solutions.

LANGUAGES

Arabic

English

Comfortable working with English in technical contexts, including reading documentation, writing code and reports, and collaborating on software development tasks.
